

LONDON
METROPOLITAN
UNIVERSITY

Module Code & Module Title
Level 5 – Network Operating Systems

Assessment Type
Logbook 2
Semester
2025/26 Spring/Autumn

Student Name: Manoj Katuwal
London Met ID: 24045922
College ID: np05cp4a240306
Assignment Due Date: Tuesday, November 4, 2025
Assignment Submission Date: Tuesday, November 4, 2025
Submitted To: Santosh Parajuli
Word Count (Where Required): 492

I confirm that I understand my coursework needs to be submitted online via Google Classroom under the relevant module page before the deadline in order for my assignment to be accepted and marked. I am fully aware that late submissions will be treated as non-submission and a mark of zero will be awarded.

1 Installation of Windows server on virtual box

1.1 Aim

The main aim is to install and configure windows server in oracle virtual box and check whether the server is successfully running or not.

1.2 Objectives

The main objective of installing of windows server on virtual box are :-

- To learn about the concepts of running different server on virtual box.
- To learn about the installation of windows server ISO file in virtual environment.
- To configure server settings like hostname and network.

1.3 Required Tools and concepts

The required tools for installation of windows server on virtual box are :-

- Virtual Box
- ISO file
- Laptop or PC should have minimum 8 GB RAM and 50 GB free storage.

The key concepts used for installation of windows server on virtual box are:-

- Virtualization
- System Configuration
- Modified virtual machine hardware of changing amount of RAM and virtual CPU count.

1.4 Steps Required for Lab

1. Step-1

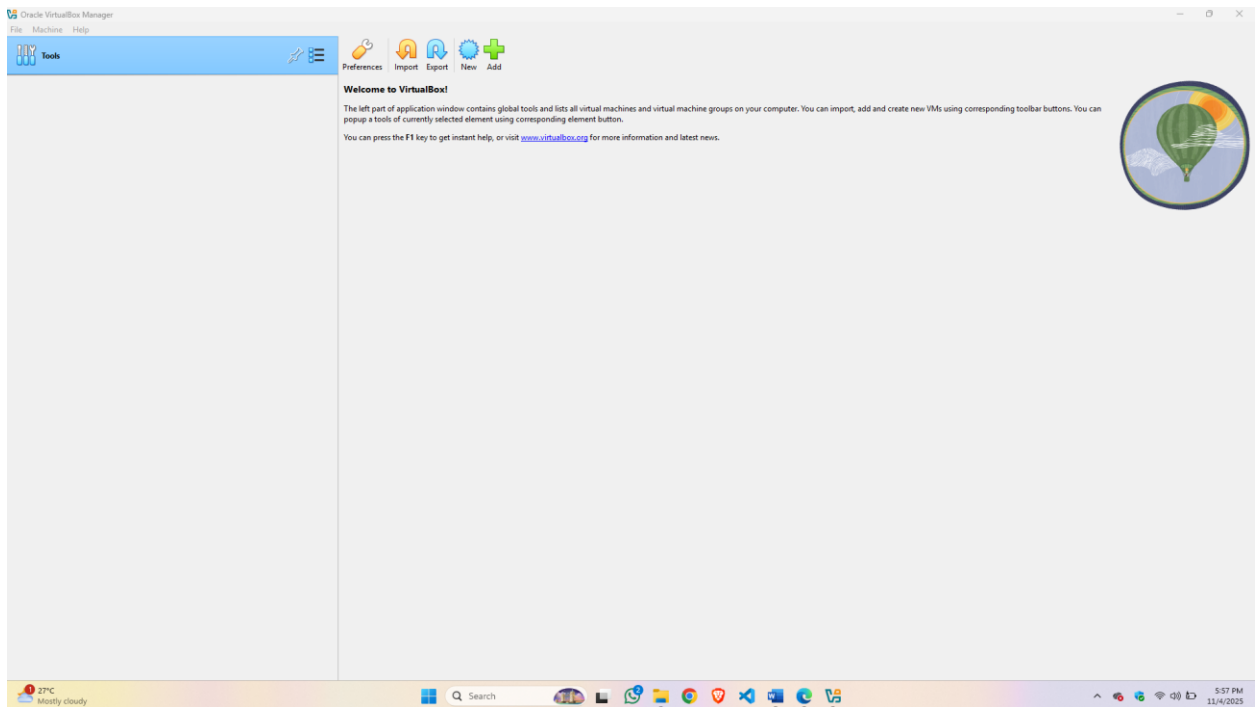

Figure 1:Opening Virtual box

Open Virtual box and click new for creating windows server.

2. Step-2

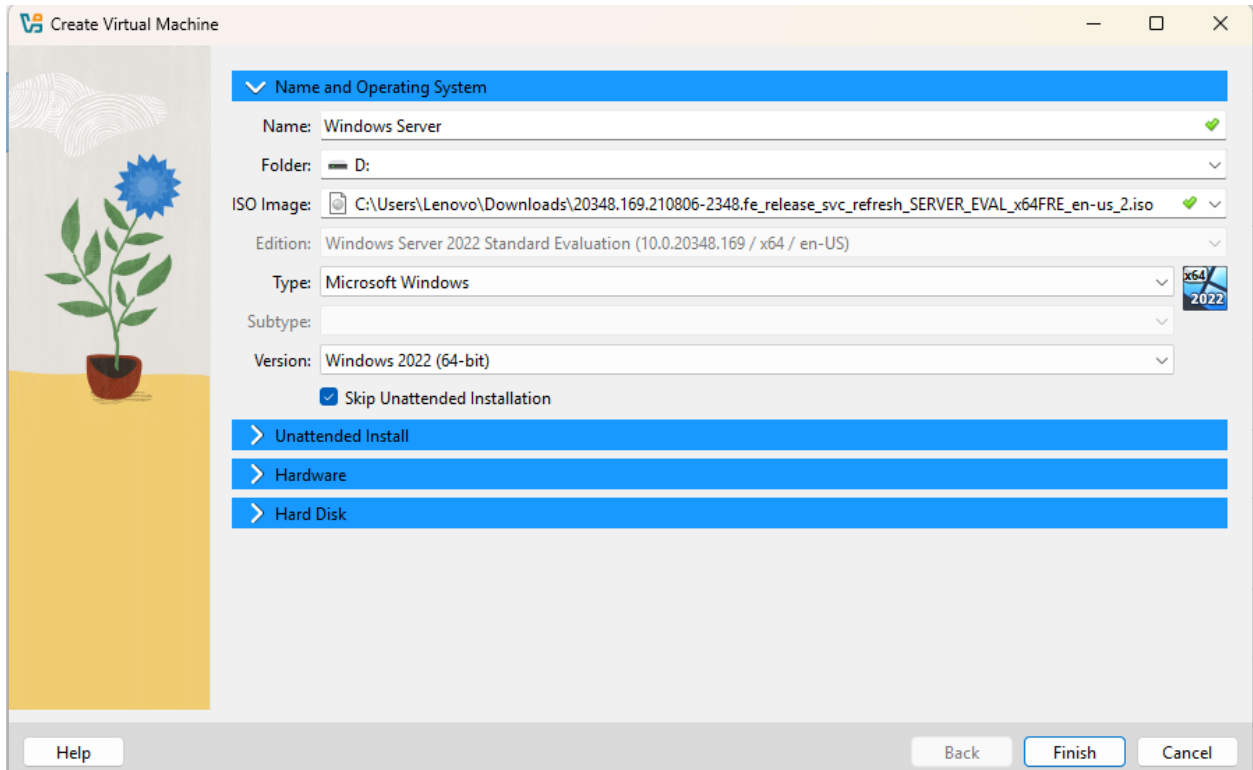

Figure 2: Name and ISO File added

After clicking the “NEW ” button the virtual box interface is displayed and here the name of the virtual machine and the folder where you want to install and the ISO file of Widows Server is allocated. And at last Skip Unattended installation option is check.

3. Step 3

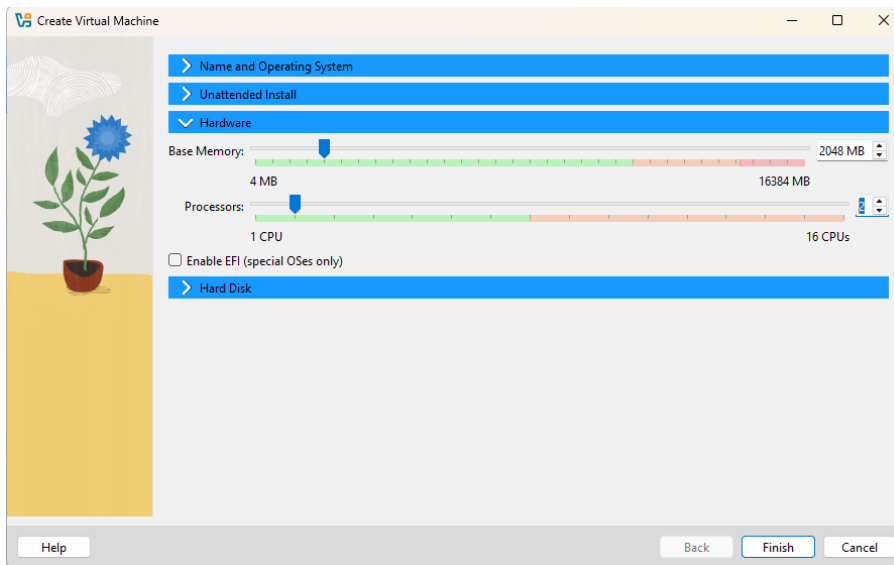

Figure 3: Hardware Allocation

In this Step, The hardware components Base Memory and Processors are allocated on Virtual Box.

4. Step-4

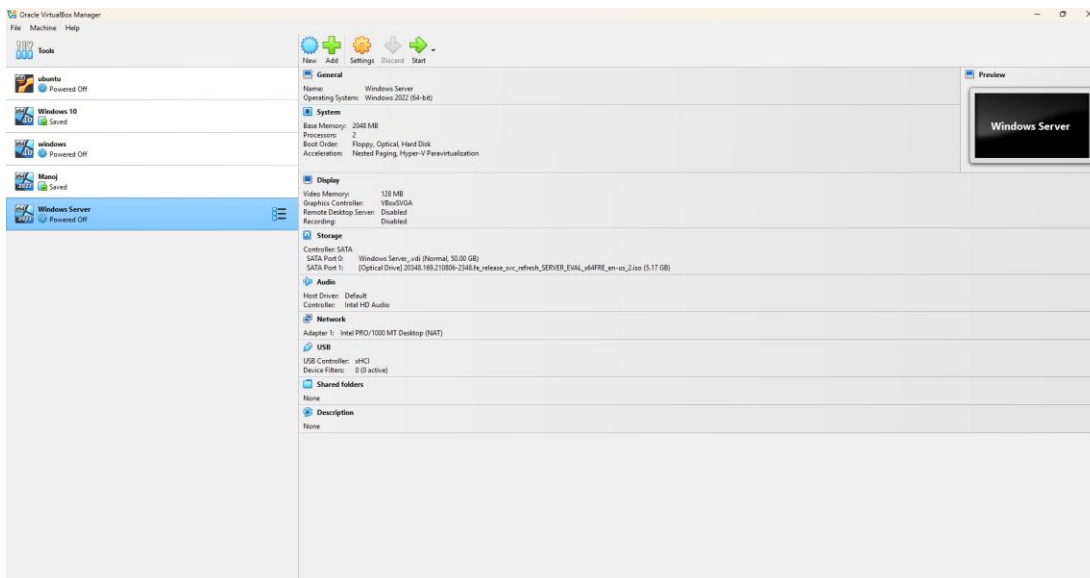

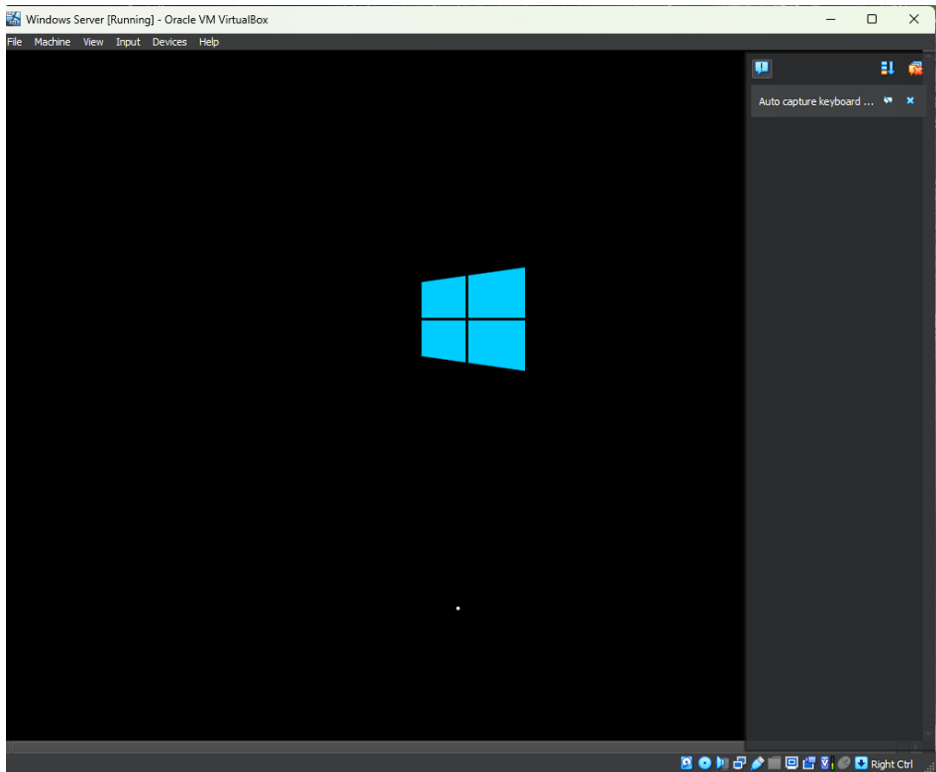

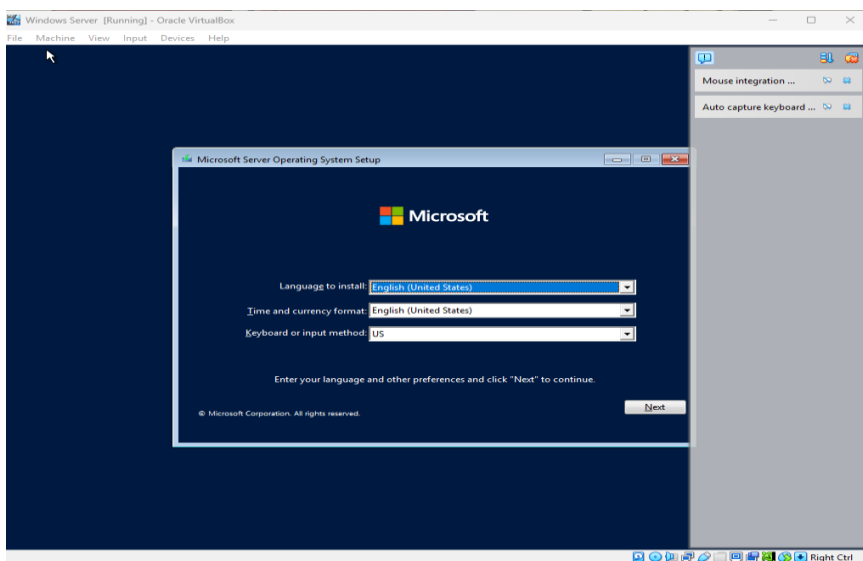

Figure 4: Virtualization Summary

In these step you can summary and check what you configure in previous step .

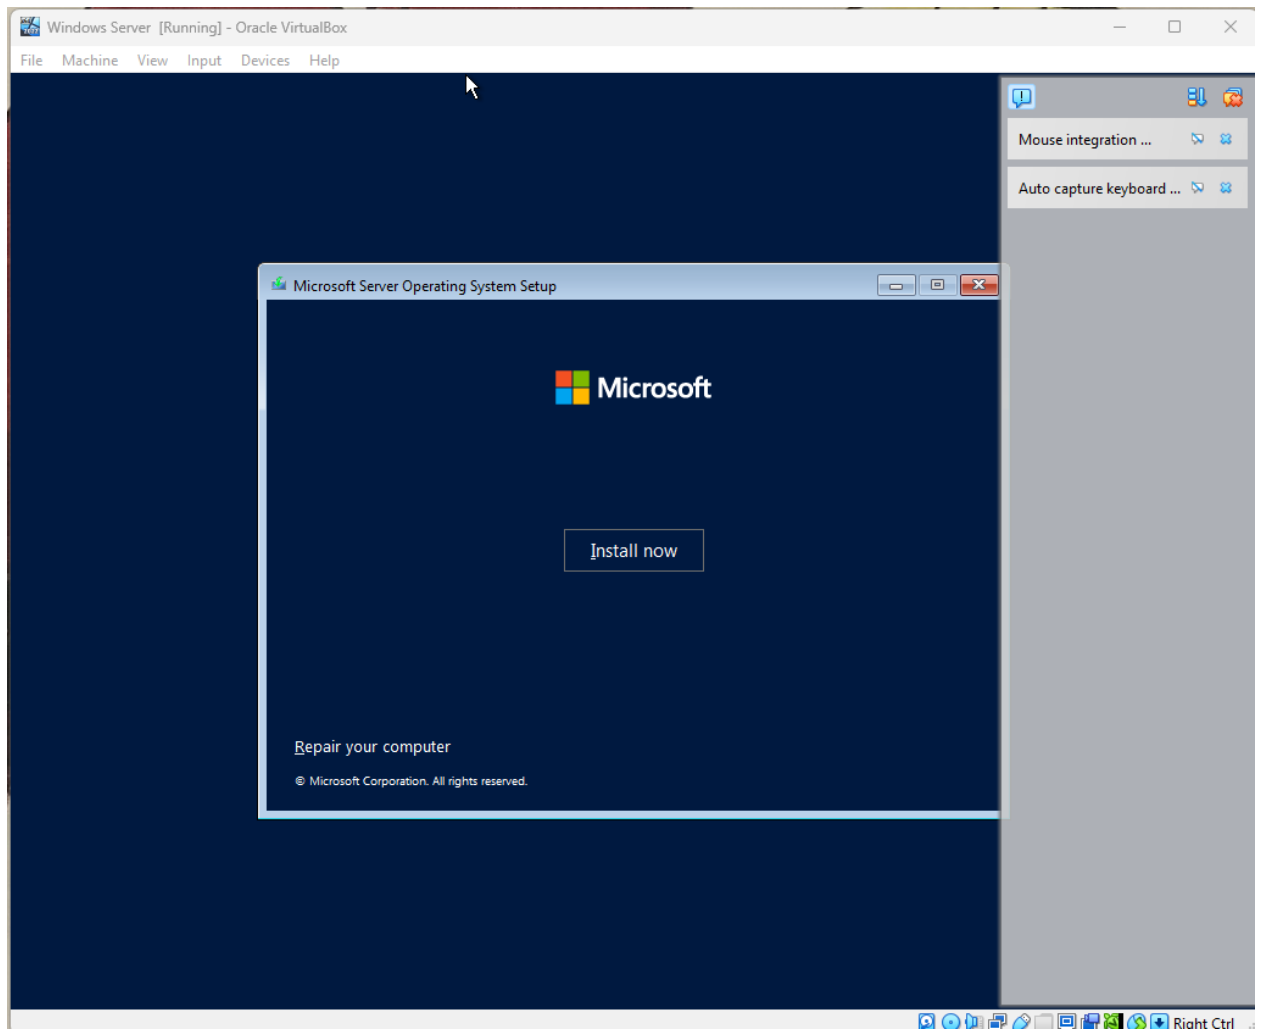

5. Step-5

*Figure 5: Starting Windows Server*

6. Step-6

*Figure 6: Language, Time and keyboard Selection*

7. Step-7

*Figure 7:Installing*

8. Step-8

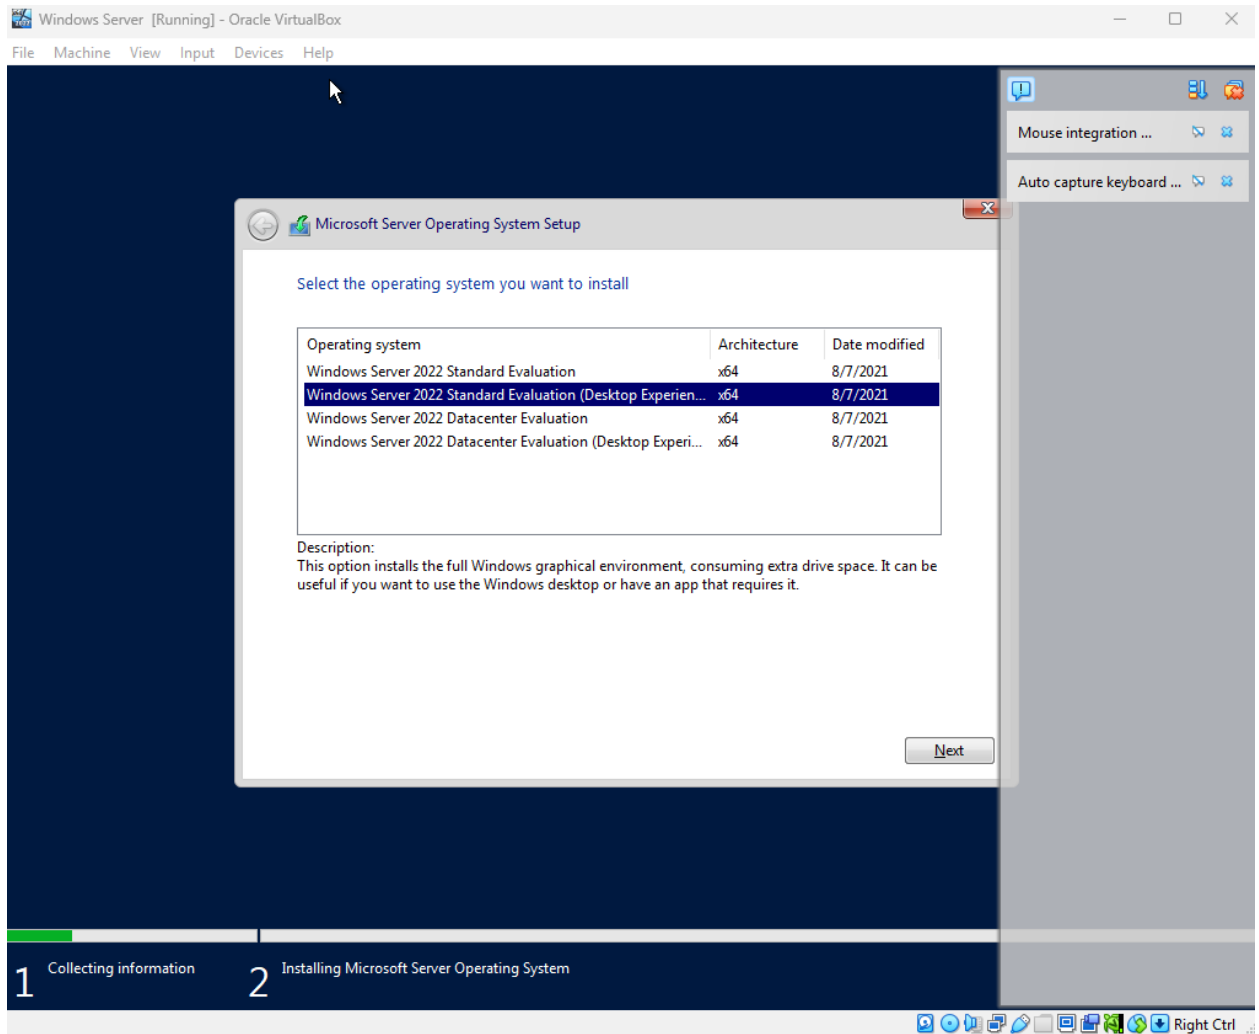

Figure 8: Selecting windows standard evaluation

9. Step-9

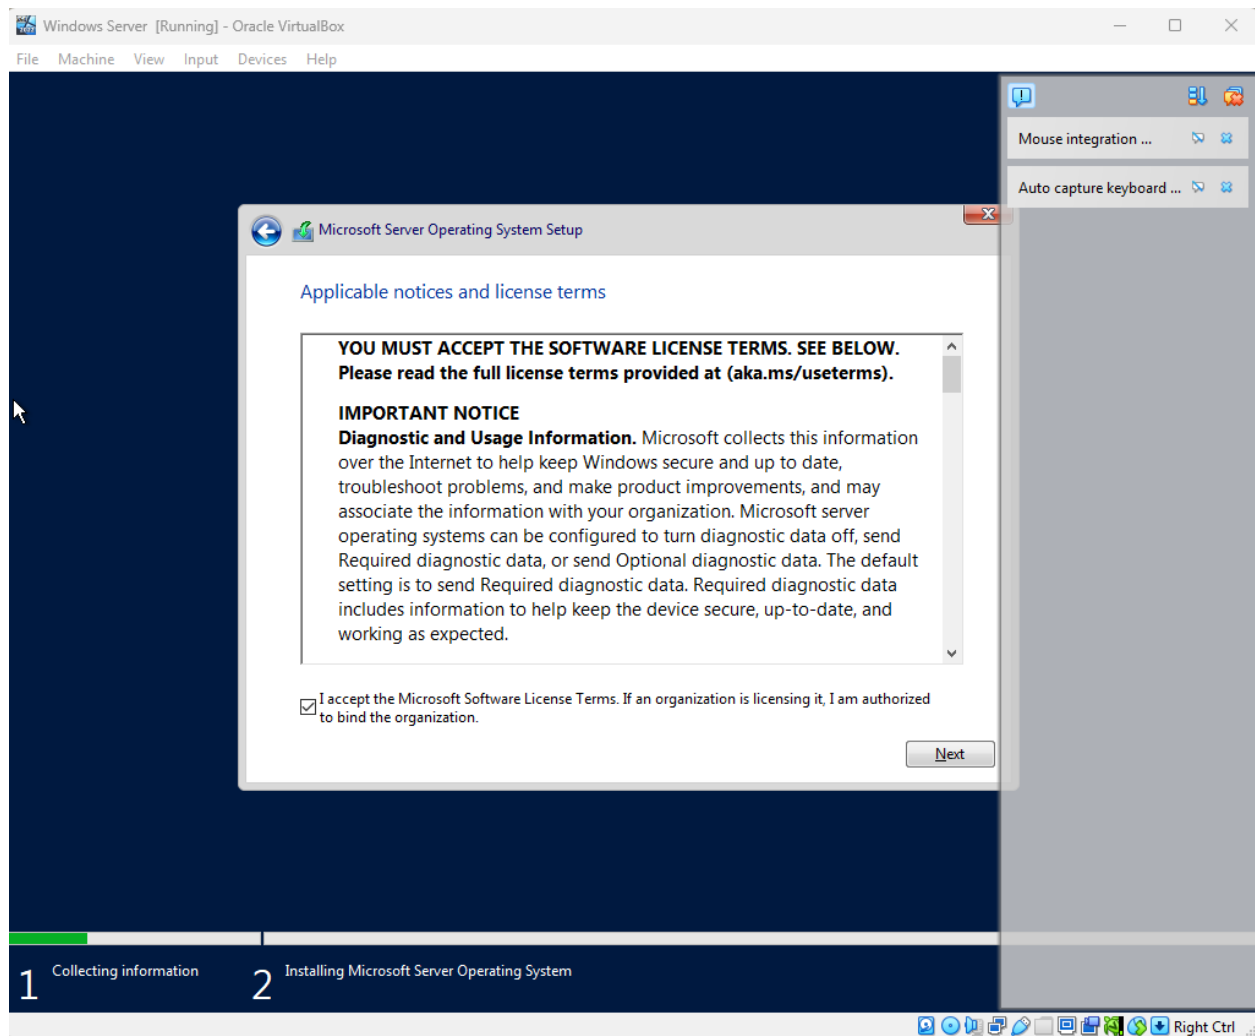

Figure 9: Accepting terms and conditions

10. Step -10

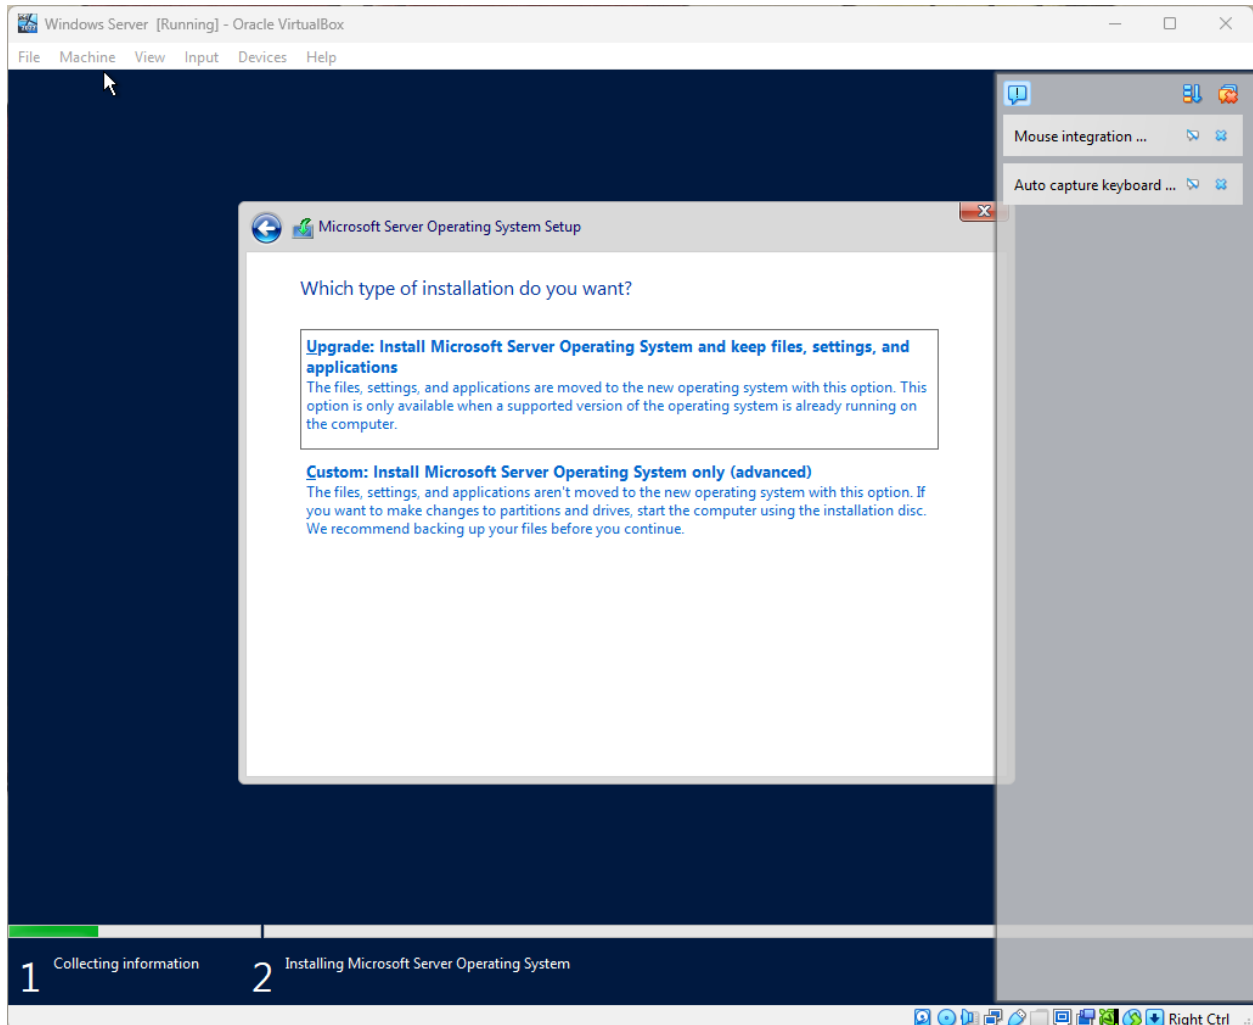

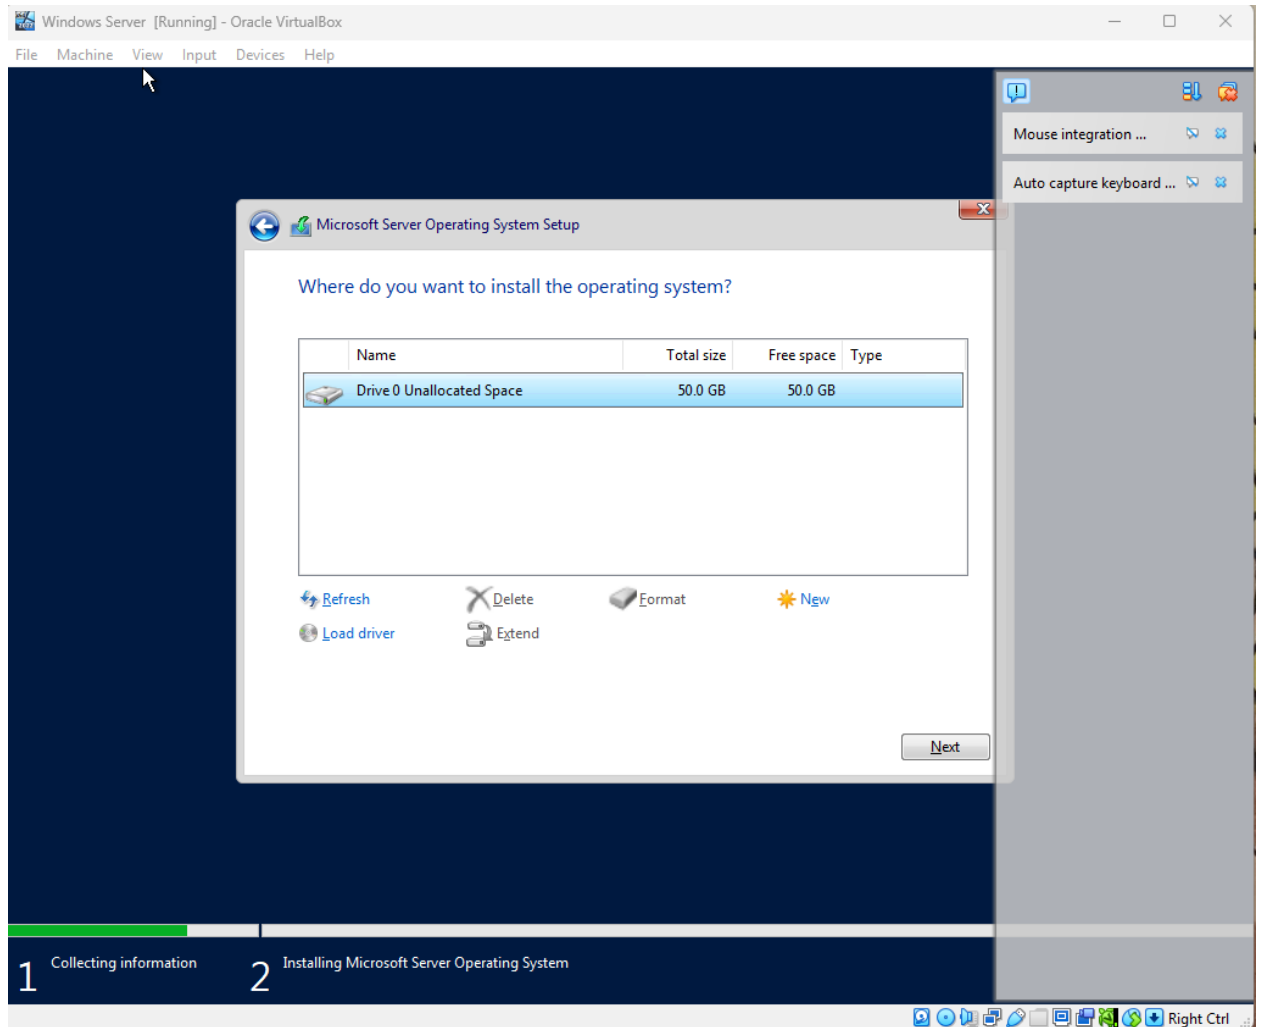

Figure 10: Installing Microsoft server by Custom

11. Step -11

*Figure 11:Disk Allocated Space*

12. Step-12

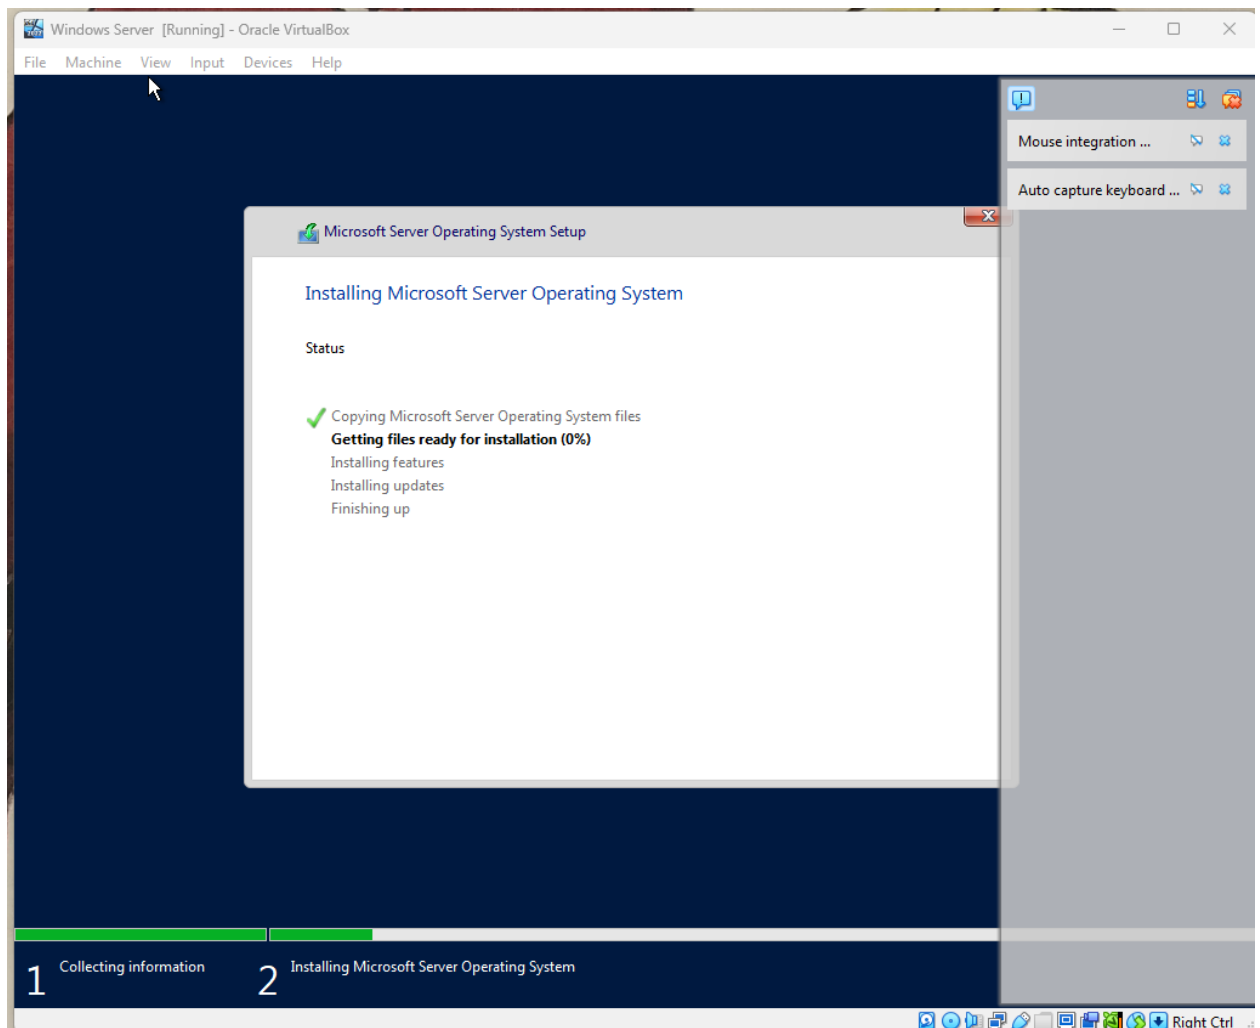

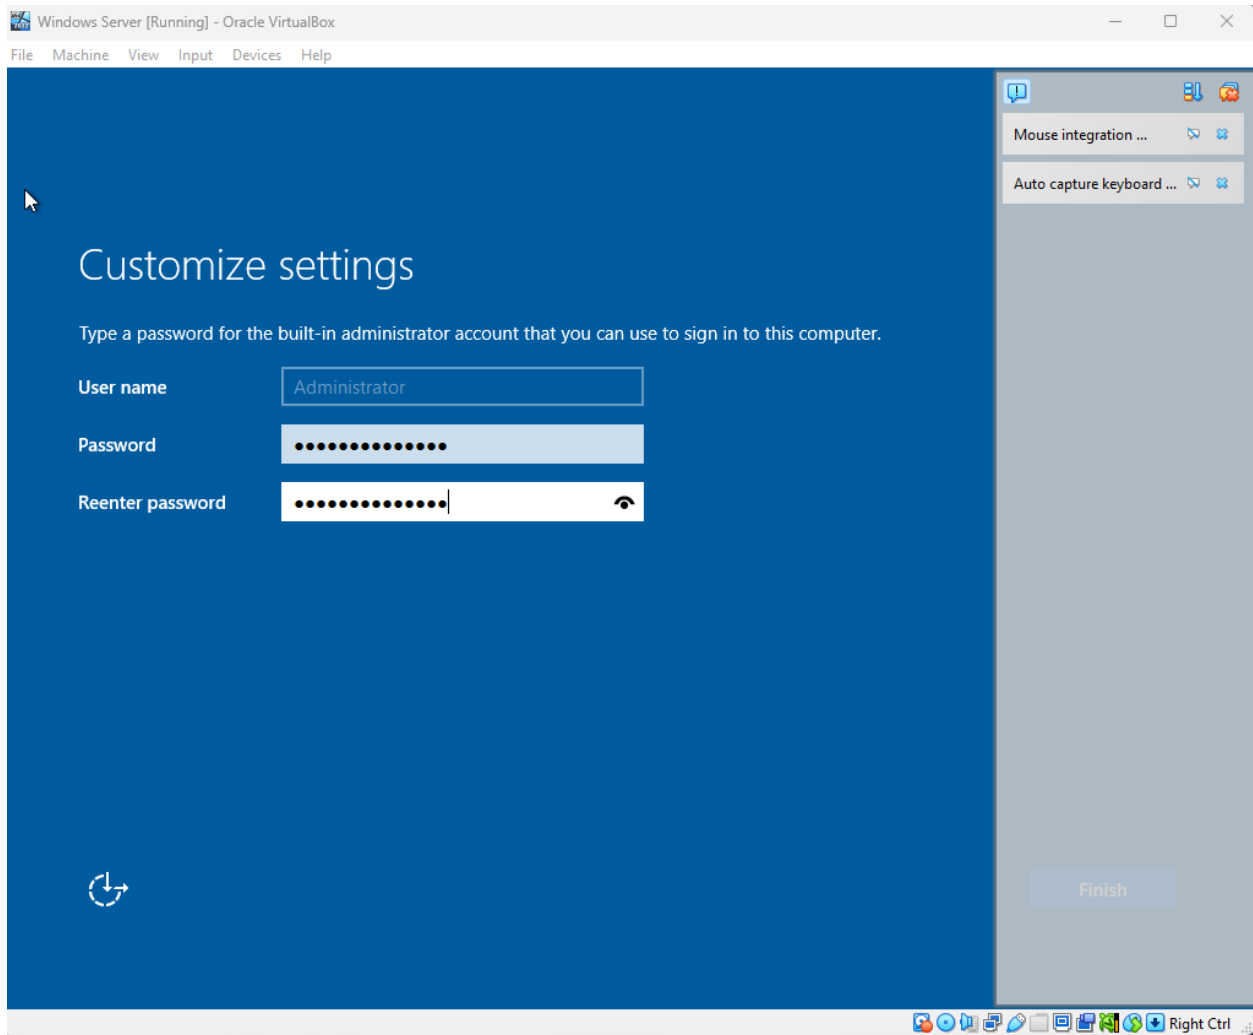

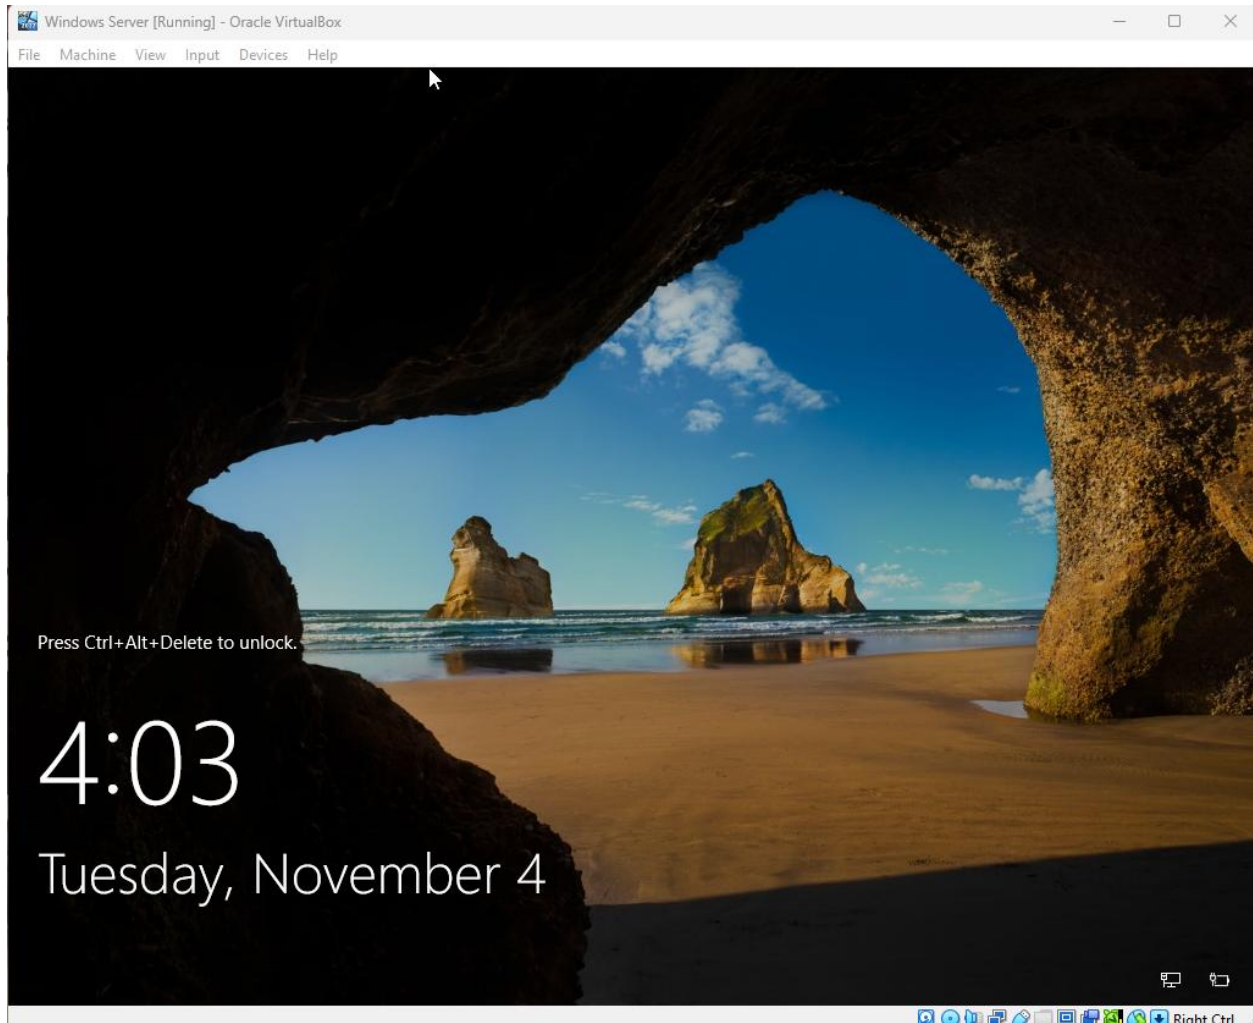

Figure 12: Installing Microsoft Server Operating System

13. Step -13

*Figure 13:Entering Password*

14. Step -14

*Figure 14: Installation Completed*

15. Step-15

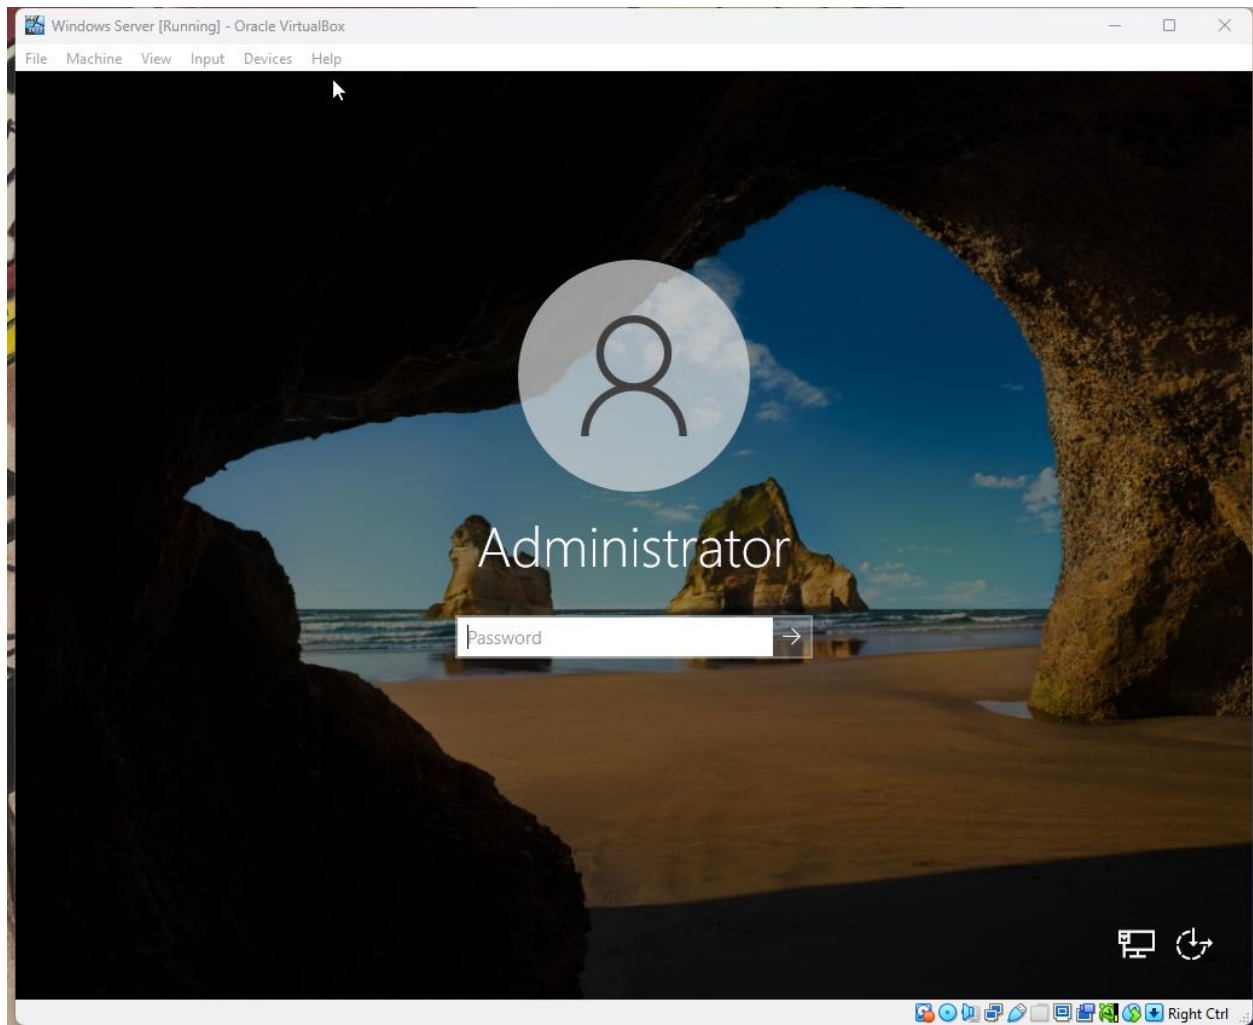

Figure 15: Entering the Password

1.5 Conclusion

Therefore, the windows server was successfully configured on virtual box. This logbook helps me to understand more about servers, virtualization etc.
