

Module Code & Module Title

Level 5 – Network Operating Systems

Assessment Type

Logbook 5

Semester

2025/26 Spring/Autumn

Student Name: Manoj Katuwal

London Met ID: 24045922

College ID: np05cp4a240306

Assignment Due Date: Tuesday, November 25, 2025

Assignment Submission Date: Tuesday, November 25, 2025

Submitted To: Santosh Parajuli

I confirm that I understand my coursework needs to be submitted online via Google Classroom under the relevant module page before the deadline in order for my assignment to be accepted and marked. I am fully aware that late submissions will be treated as non-submission and a mark of zero will be awarded.

1. Hosting static website in the windows Server 2022 and accessing it from the main OS

1.1 Aim

The main aim is to host static website in windows server 2022 and access it from main OS as well in other devices within the same LAN.

1.2 Objective

- Install and configure IIS (Internet Information Services) on Windows Server 2022.
- Deploy a static website on Windows Server 2022 and get remotely access.
- Configure network settings to allow remote access.

1.3 Required tools and concepts

Tools:

- Windows Server 2022 Standard edition installed on virtual machine via VirtualBox.
- CSS template whom you want to access it from remote device.

Concepts:

- NAT vs Bridged Adapter.
- IIS basics.
- Static website hosting

1.4 Steps Required for Lab

Step-1: Open Virtual box and select the windows server 2022 and click on the “Settings” button.

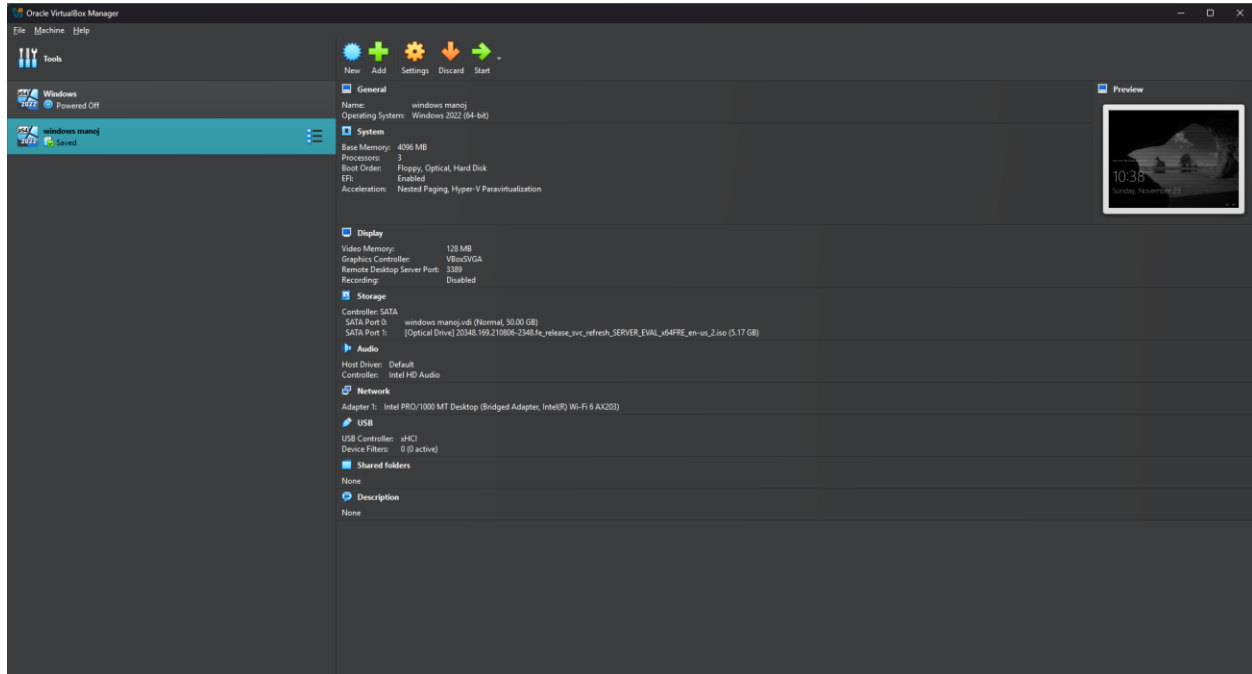

Figure 1:Oracle Virtual Box

Step-2: After Clicking the Settings tab Go to the Network section and changed the Attached to section by default it would be NAT changed it to Bridge Adapter and click on the “OK”.

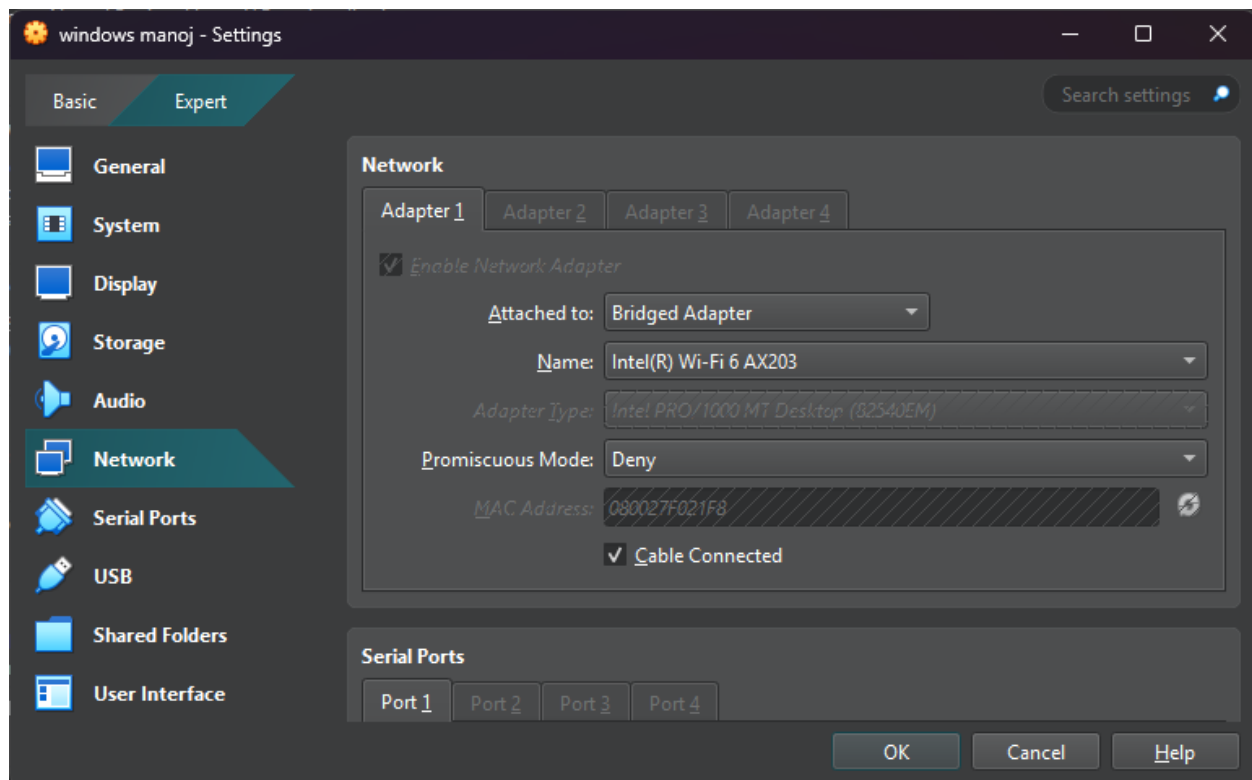

Figure 2: Windows Server 2022- Settings

Step-3: Now Start the Windows Server 2022.

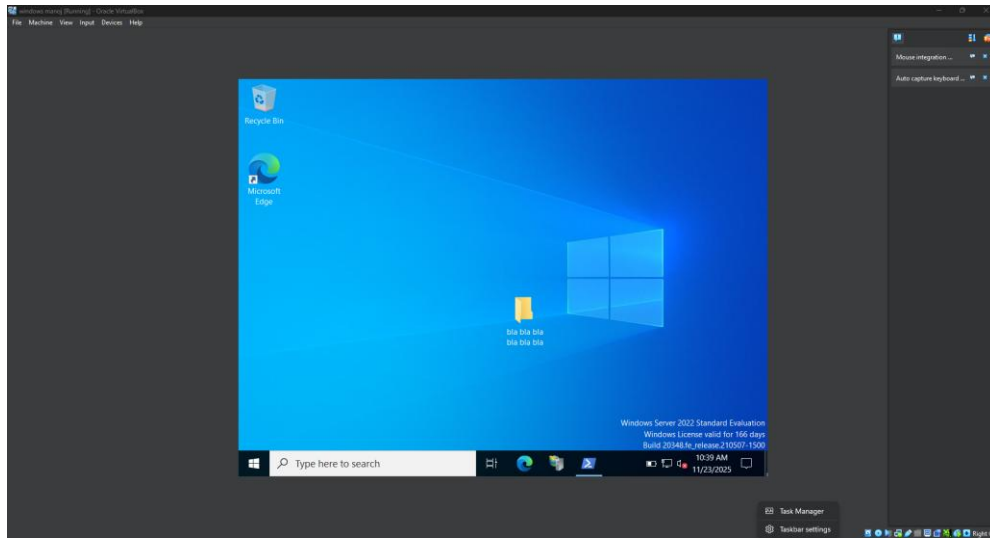

Figure 3: Starting Windows Server

Step-4: Now in Keyboard type windows + R which will open the run then type inetmgr.

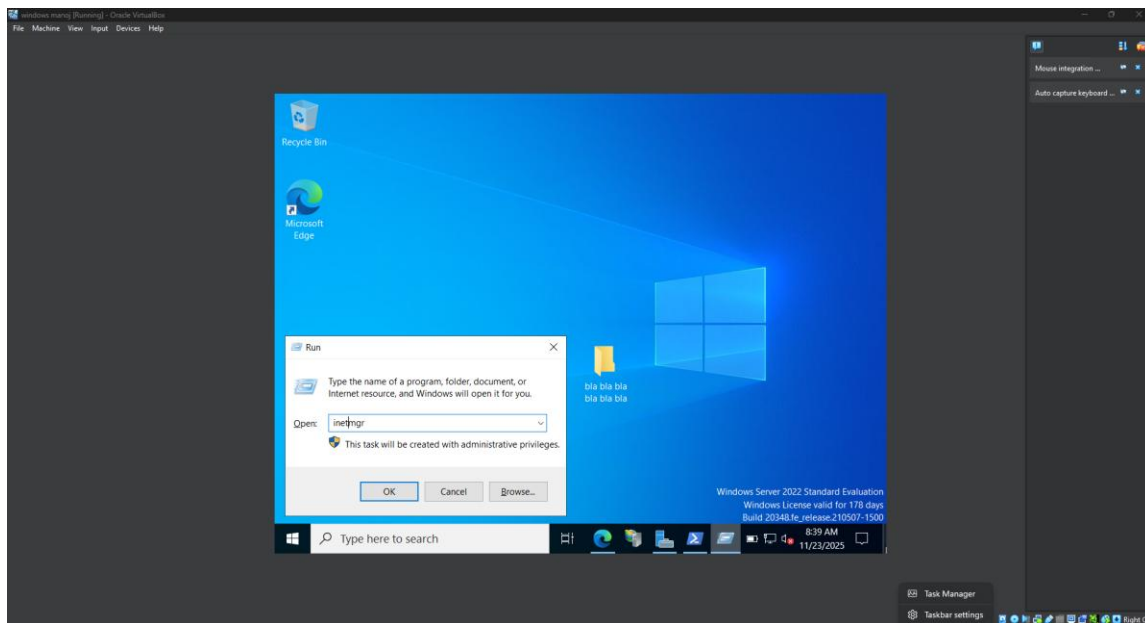

Figure 4: Opening Run

Step-5: After running the command “inetmgr” it directly open the IIS (Internet Information Services) .

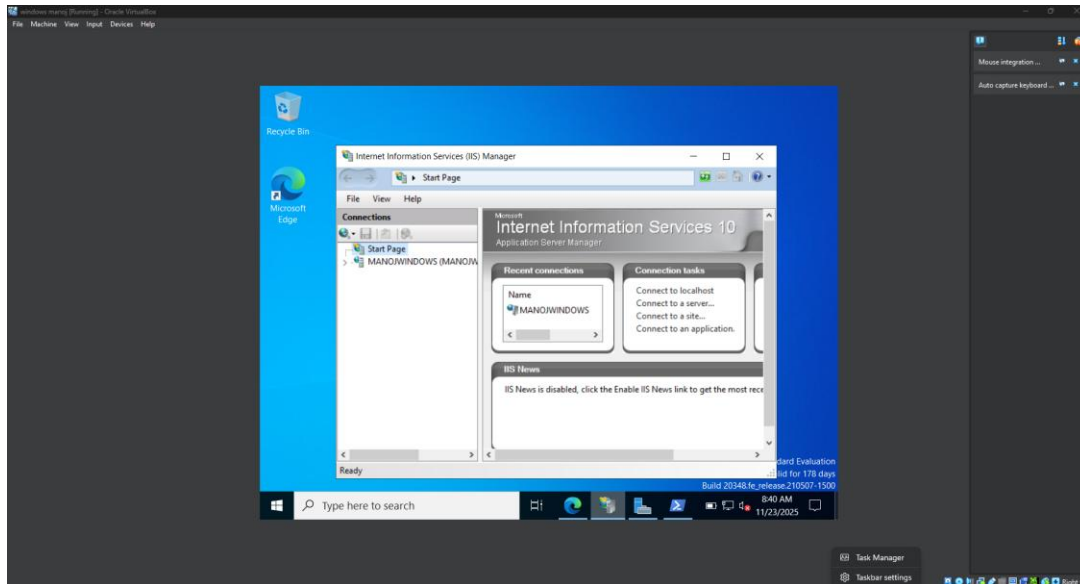

Figure 5:Internet Information Services

Step-6: Drop down your windows where you can see the sites folder right click on that and a new website.

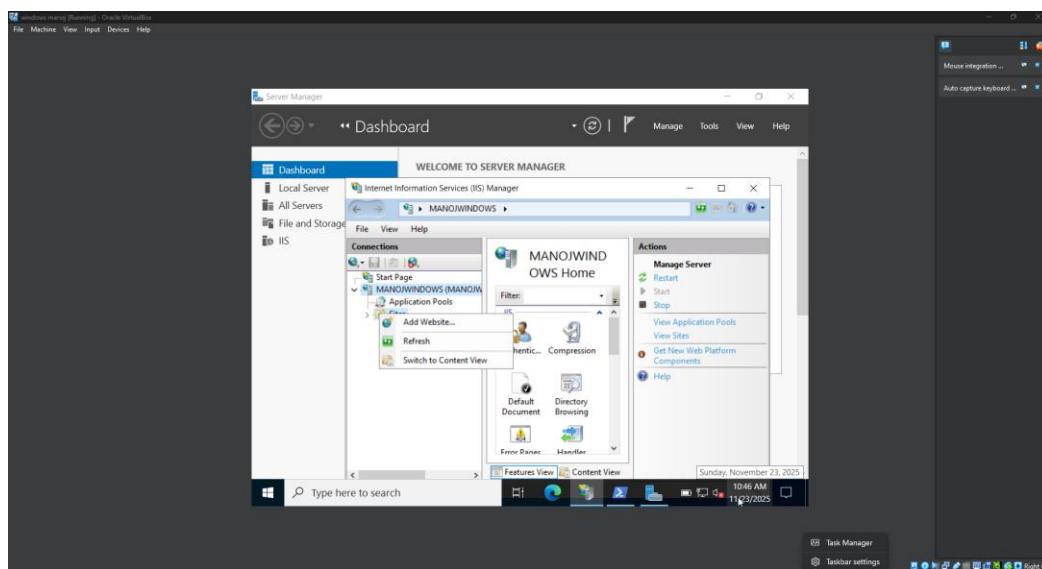

Figure 6:Adding new Website

Step-7: Now fill the blank input, example you can add site name as “mynewSite” and add a physical path should be added where your template is located where my is “C://mynumber-one-site” and assigned your IP address.

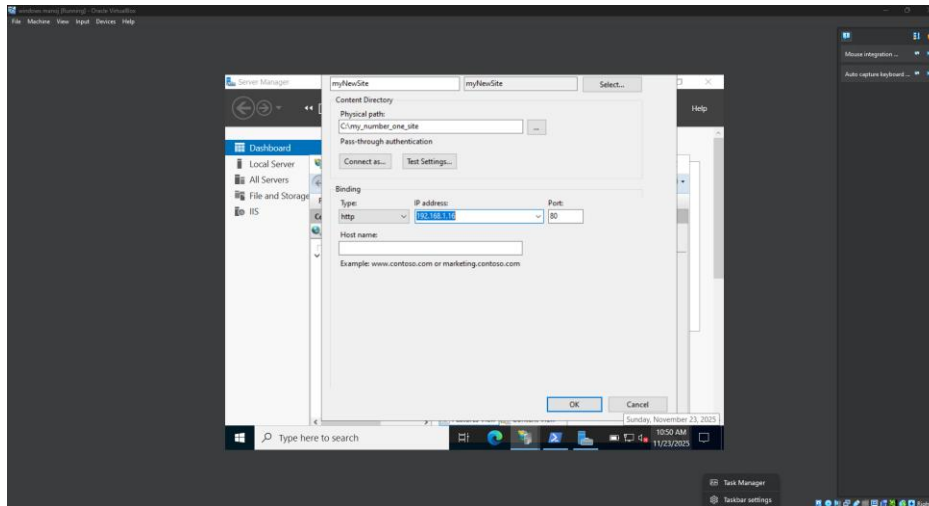

Figure 7:Filling the forms to host website

Step-8: Click on the ok button which will navigate to the IIS tab then check whether the new website was successfully added or not and also at the right bottom corner there is a browse link. Click that browse link.

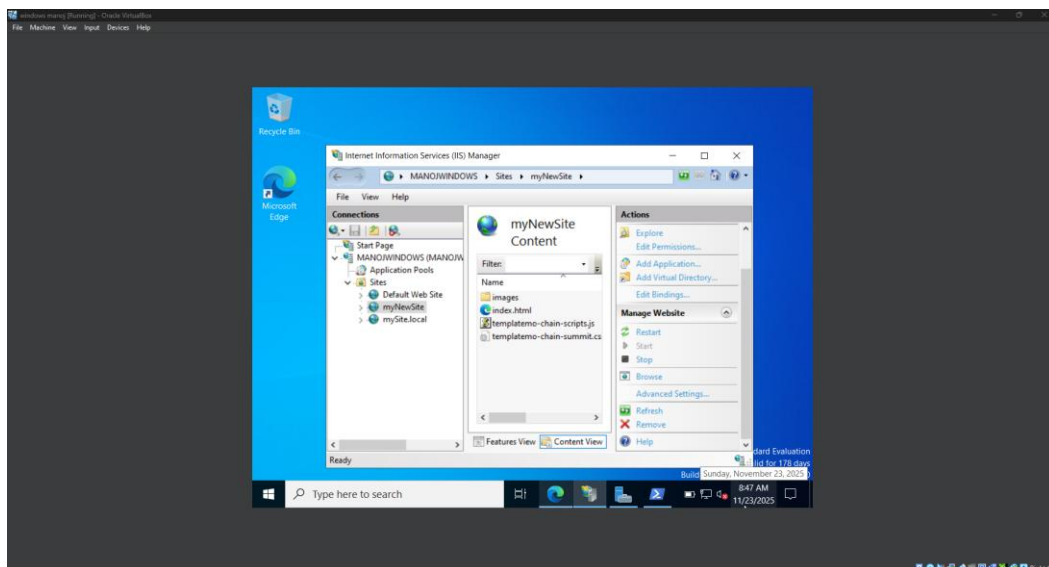

Figure 8:Browsing the website

Step-10: After clicking the browse link it will directly open a template where you recently added.

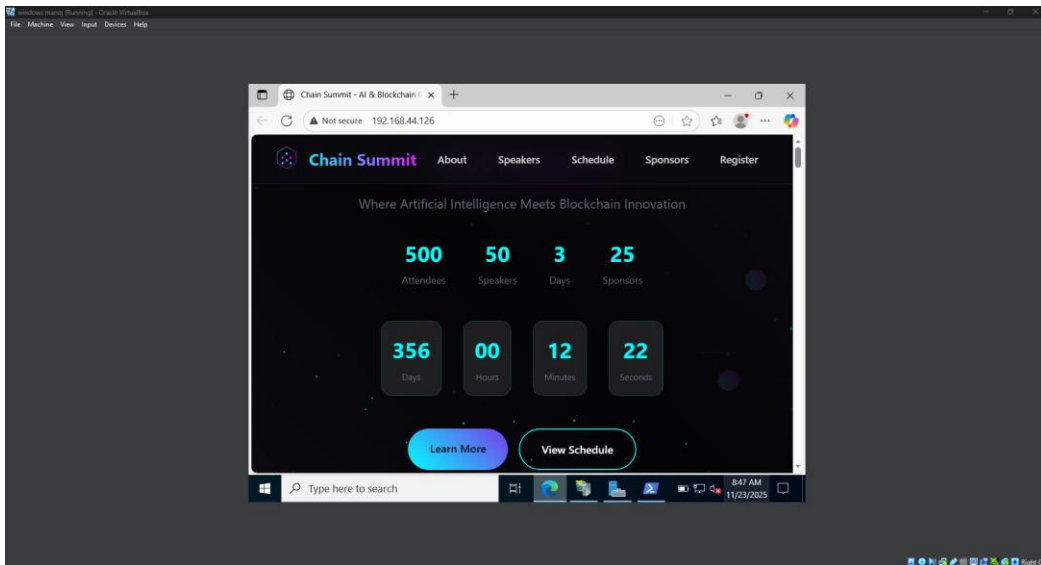

Figure 9: Opening template in Windows server

Step-11: Checking whether the website is running from host OS or not where from host OS the website is running successfully.

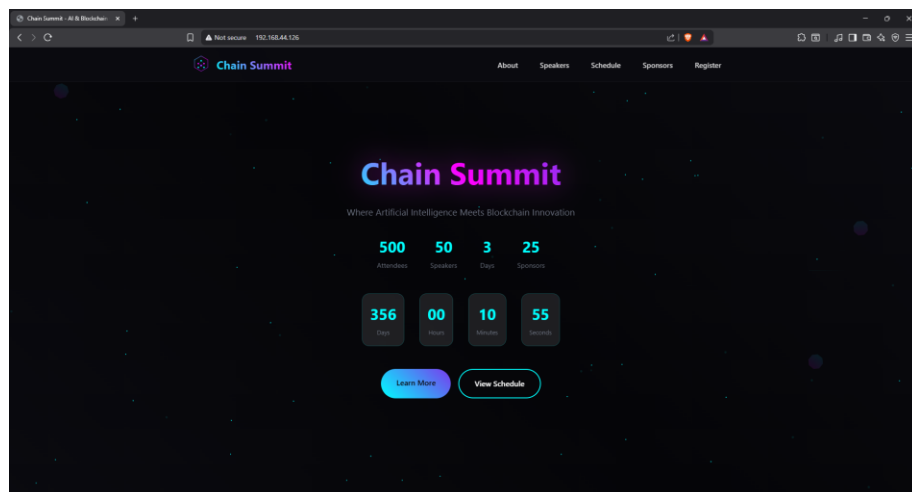

Figure 10: Running web from host OS

Step-12: Power off the windows server 2022 and open oracle virtual box where windows server 2022 is been located and select the server and click on the help button which will open a dropdown then click on the About VirtualBox.

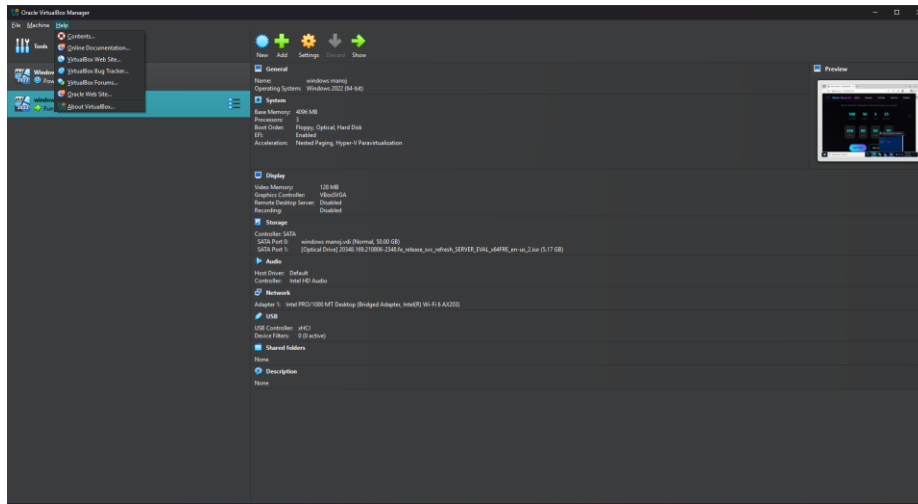

Figure 11:Virtual box-help-about virtual box

Step-13: After clicking the about virtual box button it will open about section where memorize the version where my is 7.1.4

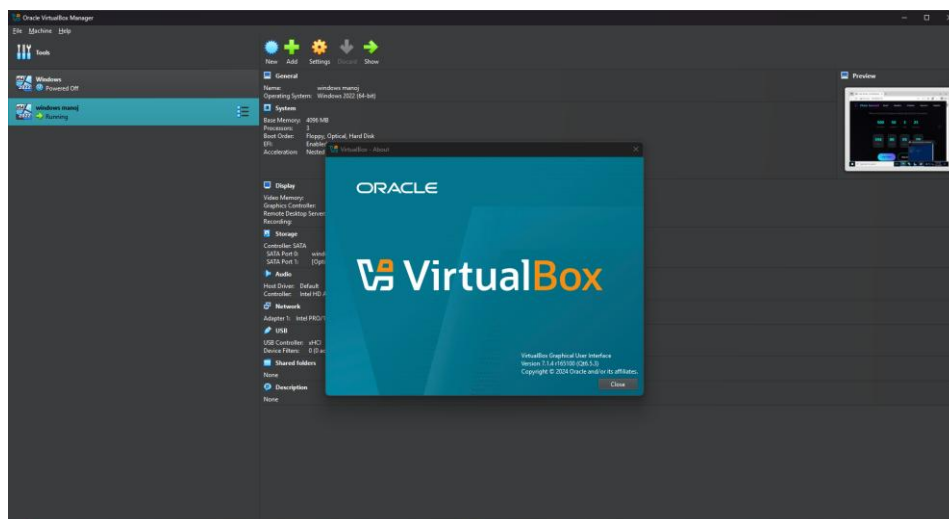

Figure 12:Virtual Box – About

Step 14: Now close the about tab and Click on Settings.

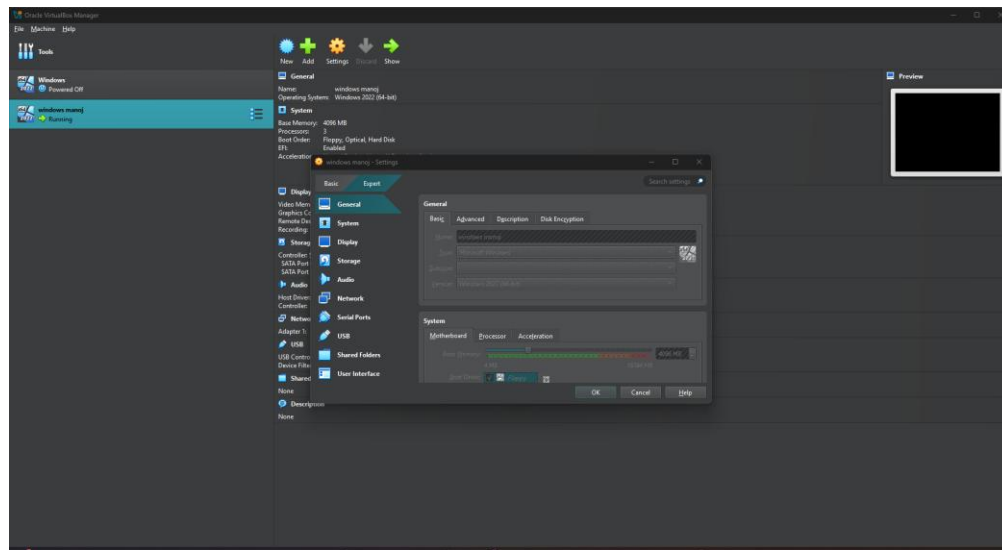

Figure 13:Opening Settings in Virtual Box

Step-15: Click on Display and tick Enable Server.

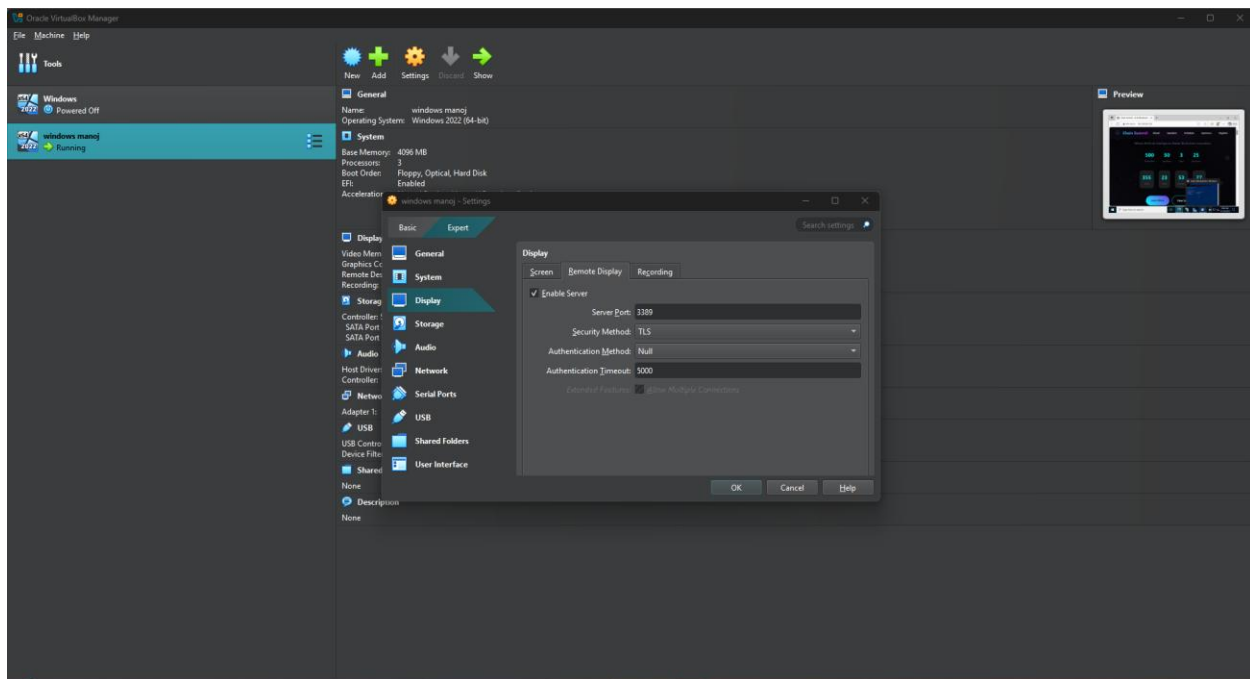

Figure 14:Enabling Server

Step-16: Now start windows server 2022 and check IP address for that open windows PowerShell and write “ipconfig” command and remember that IP address.

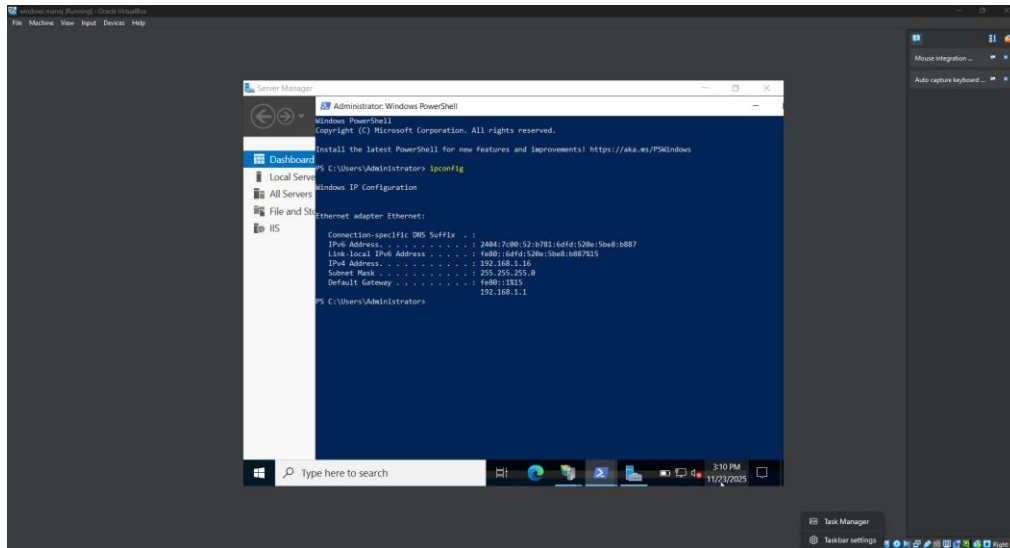

Figure 15:Checking Ip address through PowerShell

Step 17: Open the Remote Desktop Connection from the host OS and insert IP address of your guest OS and then click on connect.

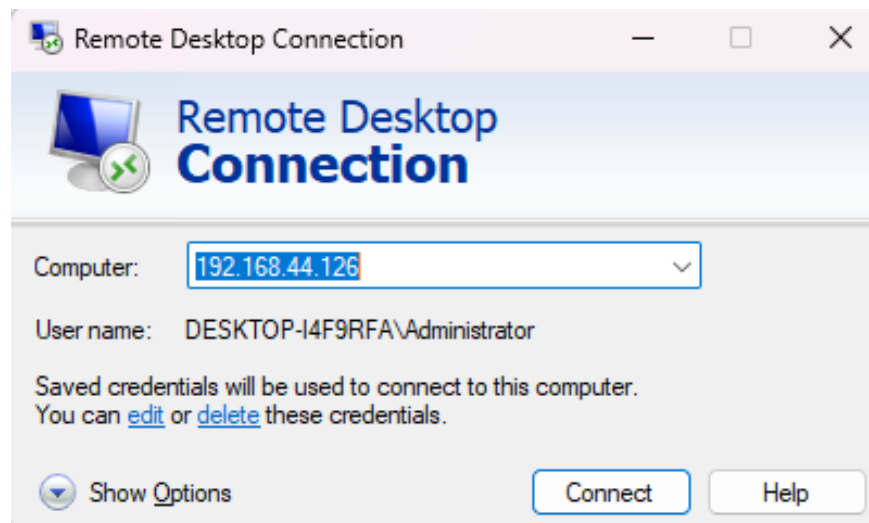

Figure 16:Opening Remote Desktop in host OS

Step 18: Enter the username.

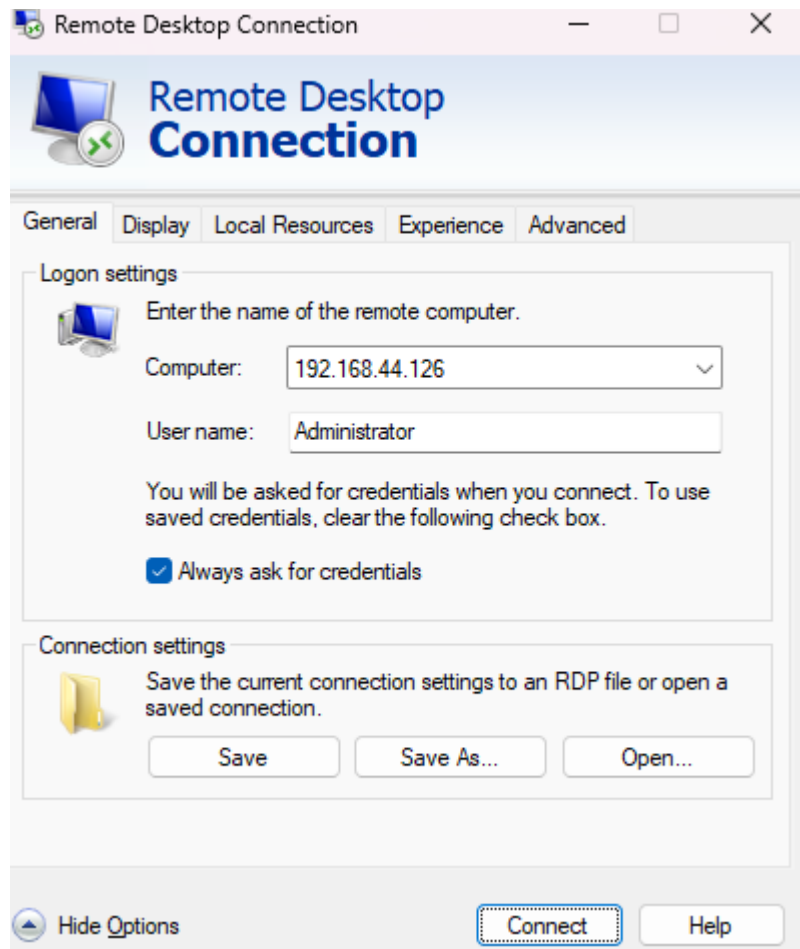

Figure 17: Entering Username

Step 19 : Now the windows Server 2022 can be remotely access.

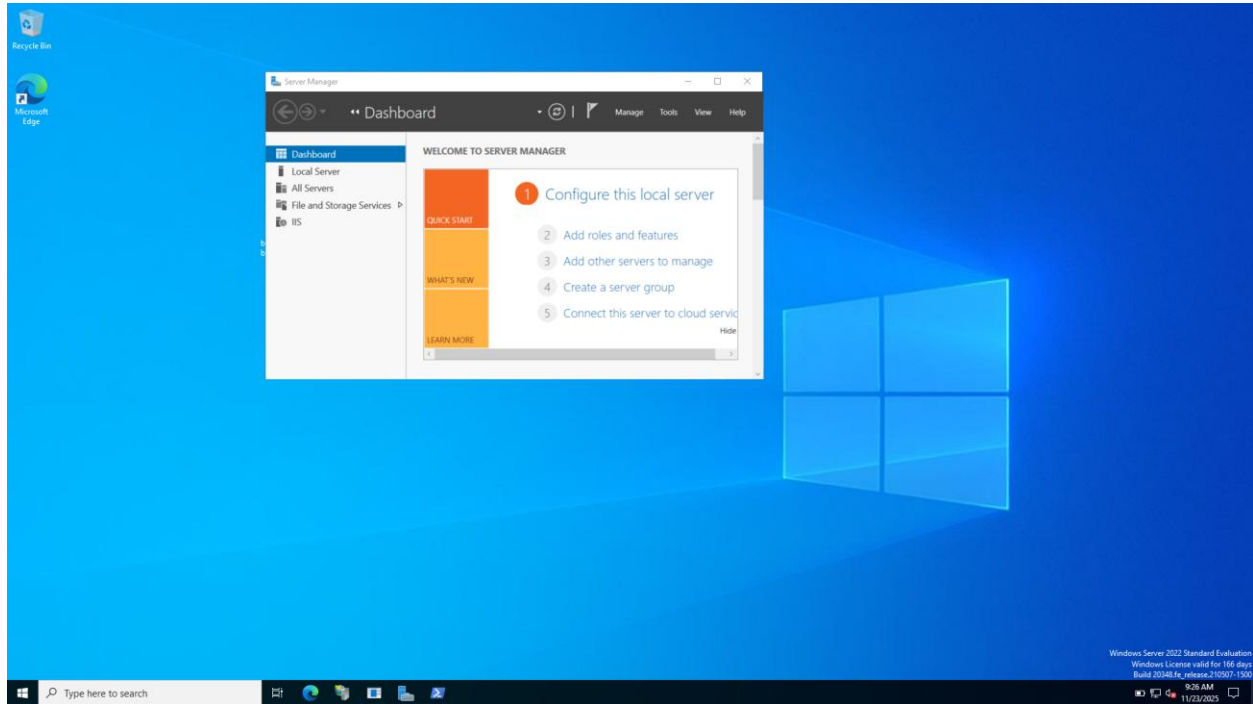

Figure 18:Remotly access the guest OS from Host OS Successfully

1.5 Conclusion

In this lab we successfully hosted a static website on Windows Server 2022 using Internet Information Services (IIS) by configuring the virtual machine network changing by NAT To bridge adapter and at last we successfully configure that we are able to access the website remotely.
